

INTELLIGENT WELLNESS

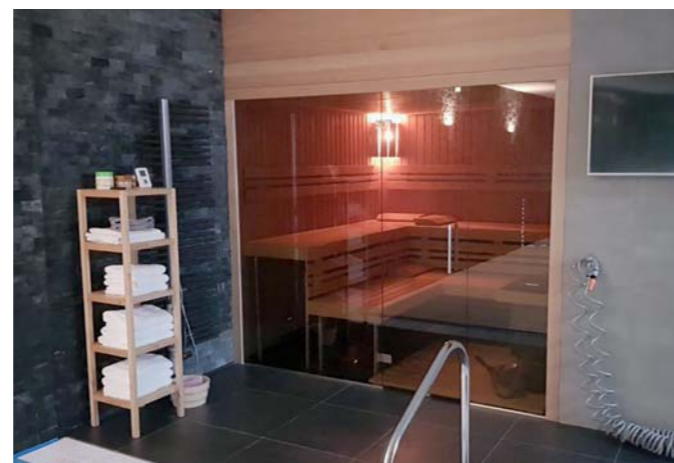

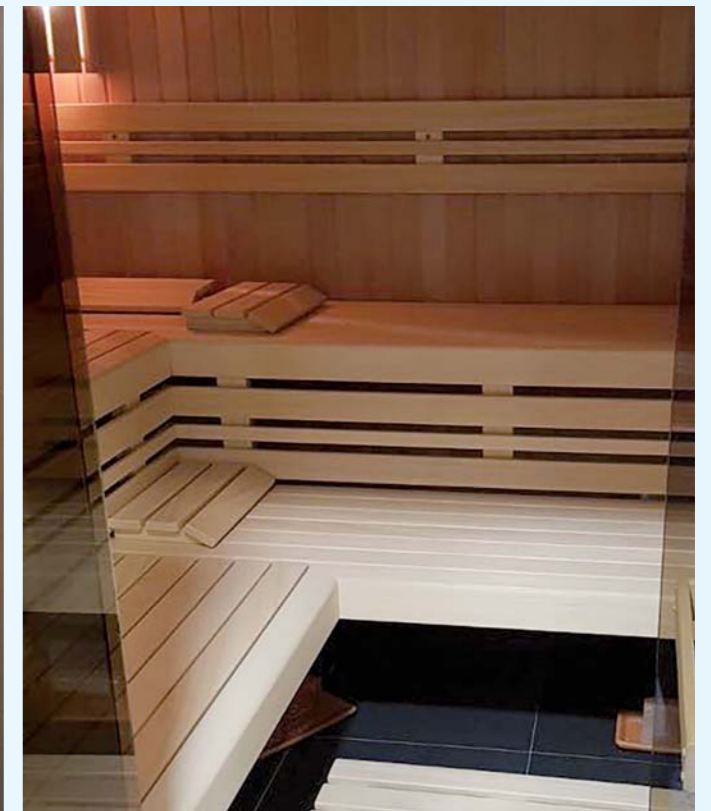

Intelligent sauna solution

A safe sauna that works with the rest of the wellness and its facilities.

Everything is simple and works completely automatically:

- Heating control is possible either via the touch screen, but also remotely through the central application of the building.
- Evaporator control in the sauna and interaction with the sauna stove.
- Opening of the cover of a pool exactly to the right size so it can be used for cooling after a sauna.
- Adjustment of the individual lighting scenes.
- Interaction with air conditioning in wellness and speed control according to sauna mode.
- Setting saunas for safety - auto off system.
- Safety system - the SOS button is located directly in the sauna, presses to turn off heating, shuts down the air conditioning and immediately calls for help.

What this system extensions include:

- 1x four-channel actuator
- 1x binary input unit
- 1x contactor

To summarize:

- ✓ A smart sauna
- ✓ Safe sauna
- ✓ Communicates with the rest of the wellness
